DETAILED ACTION

Specification

The amended specification is acknowledged by the examiner and the title objection is withdrawn.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Prior art does not disclose a combination of a dynamoelectric machine having a resin case interposed between one of the bearing housing and an associated with one of the outer bearing rings, in which the resin case is formed in the shape of a cylinder so as to cover the entire axial length of the associated outer ring. The resin case has a slit that is formed so as to extend in an axial direction from one axial end of the resin case to the other axial end. In combination with the resin case being press fitted into an associated bearing housing with one axial end positioned at an opening side of an associated bearing housings and one of the bearings is press fitted into the resin case.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
